

Vernon Tool® MPM®

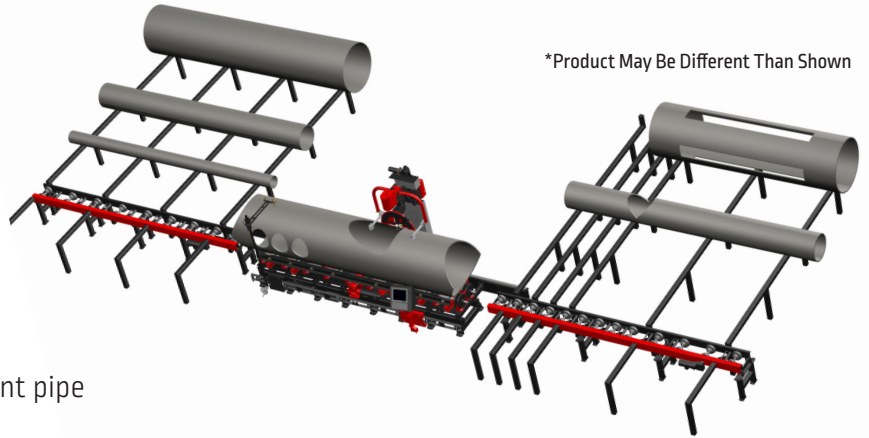

Industrial CNC Plasma Pipe Cutting & Profiling Machine

Built to Withstand Industrial Settings

- Designed for multiple shift operation
- Excellent repeatability & reliability
- Known to last 50+ years in the field

Spend Less Money Cutting Parts

- Single operator means lower labor cost
- Conveyor loading
- Rollerbed design allows use of entire pipe
- No leveling or adjustment required for different pipe diameters

*Product May Be Different Than Shown

PypeServer Software

- Automatically nest on pipe
- Import spools from CAD
- Integrates with BIM programs
- Labeling option for downstream tracking & inventory management

Peace of Mind Dependability

- 1 year machine warranty
- 3 year power supply warranty
- Industry leading technical support
- 125 years in business

Plasma Cutting System Options

FineLine® 170HD & 300HD

- Smallest diameter 300A torch in the industry
- Superior cut quality & exceptional consumable life
- 55 degree torch angle with standard consumables

FlexCut® 200

- Quick-disconnect torch head
- Dual gas capable
- Liquid cooled plasma torch

APPLICATIONS

- Process and Power Piping
- Mechanical and HVAC Contracting
- Shipbuilding
- Offshore
- Marine Construction
- Structural Pipe Trusses
- Pressure Vessel Fabrication

PRODUCT HIGHLIGHTS

- HD plasma and oxy fuel cutting
- 5 Axis machine
- Advanced material handling

Included with purchase

- Consumable starter kit
- PypeServer software
- WinMPM
- Vernon Tool Academy

KEY ACCESSORIES

- Fume Extraction System
- Two Torch Cut Off
- Ink Jet Marking System
- Preheat Torch Assembly
